### **EXAMINER'S AMENDMENT**

Receipt is acknowledged of an amendment, filed on 12/7/2004, in which claim 69 was amended. The following amendment is made to correct a grammatical error in claim 56 and to amend claim 69 to recite a regulatory sequence range for which there is support in the application as originally filed (e.g. see Figure 5B and applicants' arguments in the response filed on 12/7/2004). It is noted that claim 68 is not an original claim and that, technically, the amendment submitted on 12/7/2004 is not compliant with the revised guidelines for amendment practice under 37 CFR 1.121 for this reason. However, it is clear from the record that claim 68 as presented in the 12/7/2004 amendment is properly a "previously presented" claim and does not comprise any changes from the previous version. Because the version of claim 68 presented in the 12/7/2004 response is the same as that submitted previously and does not raise any patentability issues, and in the interest of expediting prosecution, the amendment filed 12/7/2004 has been accepted.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Megan Williams on 3/4/2005.

The application has been amended as follows:

In the claims:

Art Unit: 1636

In claim 56, line 1, the word --the-- has been inserted between the words "wherein" and "lymphoid".

In claim 69, line 2, the term "-28" has been deleted and replaced with the term -- -27--.

### ***Conclusion***

Claims 35-36, 39-40, 43-49, 56-57 and 62-69 are allowed (now claims 1-21).
